DATE	December 2025
DESCRIPTION	Inner Guard Compressor Bracket for Toyota Prado 250 - EU Spec
PART NO.	TLR682110
AVAILABILITY DATE	February 2026
RRP EU Ex. VAT	242.71 EUR

WHERE DO I MOUNT MY COMPRESSOR?

Mounting air compressors in modern vehicles is increasingly challenging as engine bays get tighter and leave little room for accessories. With large 4WDs becoming the go-to choice for many customers, making use of limited interior space—without affecting daily practicality—remains a key challenge.

OVERVIEW

The Air Compressor Bracket for the Prado 250 EU spec models provides a clean and practical solution for securely mounting your ARB Brushless or Brushed, Twin or Single Air Compressor. Designed to fit within the open space behind the rear left-hand side inner guard, the bracket positions the compressor in an easy to access location and provides optimal airflow around the compressor for ventilation. The mounting bracket set also includes 2 optional ARB Air coupling and electrical switch mounts. The first option mounts directly to the main compressor bracket which positions the switch and coupling behind the main storage compartment door to ensure compatibility with the OE bottle jack location. The second option located the switch and coupling in the OE bottle jack opening for ease of access, this is generally the recommended option when installing in conjunction with the ARB 4L air tank.

PLEASE NOTE:

- Installing the tank kit requires relocation of the factory bottle jack.
- This Bracket set is designed to suit the European Variant of the Toyota Landcruiser 250 series.
- Instruction manual & Tech Data Sheet in ARB Central

FEATURES

- Versatile Compatibility - Suits both ARB Brushless and Brushed, Twin and Single Air Compressor models.
- Space Saving Design - Fits in the open space in rear quarter of the vehicle.
- Durable Construction - Laser cut from zinc-coated 2.00mm steel.
- Corrosion Resistant Finish - Powder coated in a black textured finish for rust protection.
- Hassle Free Installation - Use of pre-existing holes.
- Comprehensive Kit - Additional Mounting Brackets to suit Electrical Switch, Coupling and Air Tank.
